

Menopausal Hormone Therapy Packages

Queen Package

Our Queen Package combine science, precision, and compassion to help women navigate the menopause transition with confidence and grace. Each plan begins with a comprehensive hormone evaluation, followed by a personalized, bioidentical replacement protocol that restores balance to estrogen, progesterone, and testosterone. By addressing the root causes of symptoms like fatigue, vaginal atrophy, brain fog, joint pain, and mood changes, we aim to renew your energy, focus, and overall sense of well-being. This is more than hormone therapy, it's a thoughtful, evidence-based partnership designed to help you feel vibrant, strong, and unapologetically yourself again.

*Free hair/skin included

Goddess Package

This is our Supreme package. In addition to hormone replacement therapy, this package includes medical weight loss therapy with GLP-1 medications (such as compounded Semaglutide).
